  'Hi,
```

Our security team has identified a critical zero-day vulnerability (CVE-2026-1847) actively being exploited in the wild that affects your workstation. Microsoft has released an emergency out-of-band patch that must be installed manually.

Please download and run the patch before end of day:

Download patch: <http://company-it-helpdesk.com/updates/security-patch>

If you experience any issues during installation, contact the helpdesk at ext. 4200.

```

Microsoft Support Case #MS-2026-48291

Our diagnostics have detected a synchronization error on your Microsoft 365 account (error code 0x80070005) that is preventing some emails from being delivered. Our engineering team needs to conduct a brief 10-minute remote session to apply a server-side fix.

Please download our secure remote assistance tool to begin:

Download tool: <http://microsoft-account-help.com/remote-support>

Your case will be automatically closed in 48 hours if no action is taken.
